#### **DETAILED ACTION**

1. This is responsive to the amendment filed 8/31/09. Claims 6-9 and 11-16 are pending.
2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the elements comprising the navigation drive system (claim 6) and the navigation system (claim 11) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. Applicant is also reminded that the specification must be amended to include a brief description of the drawing and relevant description thereof in the detailed section (note page 4, second paragraph of the substitute specification appears to be readily amendable to refer to the added drawing).

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New

Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A. As per newly added claim 15, "the navigation data reading device" lacks antecedence in claim 13.

5. Claims 6-9, 11-14 and 16 are allowed.

6. **REMARKS**

With regards to the drawing objection, 37 CFR 1.83(a) unambiguously states"

"The drawing in a nonprovisional application **must** show every feature of the invention specified in the claims". (emphasis added)

The single drawing filed in this nonprovisional application does not show every feature of the claimed invention. Conventional features may be shown as graphical representations where detailed illustrations are not necessary for understanding the invention.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
